

# **PRESIDENT'S REPORT**

## **January 2007**

Hello All Members of the Canoe Club:

Well, Happy New Year! 2007 has arrived!

Your Directors hope that everyone had a wonderful holiday with your families and friends. The weather has been unbelievable, record breaking, and not very pleasant for snow activities.

The AGM was well attended and lively. The presentations were very interesting. I want to thank all that came out and contributed to the discussions and decisions.

The new Board has started work and all the Directors are busy with their new portfolios. If anyone wants to help as a coordinator, or assist in any of the activities or duties, please contact a Board member. The Directors are listed here with their portfolios and phone numbers. We would be glad for your assistance.

Please feel free to contact any Director with ideas, suggestions or comments about our activities, programs and administration. All ideas are discussed and appreciated.

This year we will be doing more repairs to the club to make it more safe and secure.

As you can see in the newspaper, the Springbank dam is front page news. If the weather holds out, it will be finished by the end of March. However, the fish migration study will delay the opening once again. We expect to open in the second half of June, as last year. Please try to be patient with the situation. The Directors are working hard for some alternatives.

Have a safe & healthy winter,

Addie Gushue

President
